Smart Materials for a Green(er) Economy

Guest Editor:

Prof. Dr. Pascal Nicolay

Carinthia Institute for Smart Materials, Carinthia Unversity of Applied Sciences, Villach, Austria

p.nicolay@fh-kaernten.at

Deadline for manuscript submissions: **30 April 2023**

Message from the Guest Editor

Smart materials can help to significantly reduce the environmental impact of manufactured products. Some, for example, can greatly reduce the energy consumption of air conditioning systems (e.g., phase change materials, or PCMs). Others, such as shape memory materials, reduce the complexity of systems and facilitate their recycling. Other examples include self-repairing fabrics, which can extend the life of products, and metamaterials, which allow a significant reduction in the weight of structures while maintaining a high level of performance.

The objective of this Special Issue is to give an overall perspective on the different families of smart materials which can significantly contribute to a greener economy and, more generally, to a greener world. It will include review papers as well as publications dedicated to the research and development of specific solutions based on these smart materials.

Editor-in-Chief

Message from the Editor-in-Chief

Prof. Dr. Takayoshi Kobayashi

Advanced Ultrafast Laser Research Center, The University of Electro-Communications, 1-5-1, Chofugaoka, Chofu, Tokyo 182-8585, Japan As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: <u>JCR</u> - Q2 (*Engineering, Multidisciplinary*) / <u>CiteScore</u> - Q2 (General *Engineering*)
